TG Coders (tgcoders.com and tgcoders.pl) confirms Bizz Community as a trusted business partner for delivering high-quality leads related to mobile and web application development projects valued at \$40,000 USD and above.

We have been working with Bizz Community since 2024, when the project operated under the Client Unity brand. Throughout this time, all of our business objectives were met as agreed, and the leads consistently demonstrated high quality with excellent conversion rates. Our company especially values the smooth communication with our dedicated account manager - we always received prompt responses to our questions along with openness to suggestions and feedback, which had a real impact on maintaining the quality of IT sector contacts provided.

The collaboration mainly focused on acquiring clients interested in web-based solutions, such as custom ERP and CRM systems and enterprise applications, as well as advanced startup projects with a high level of technological complexity. Additionally, over the course of our partnership, we benefited from flexibility in tailoring the leads to our current project needs, which significantly boosted the effectiveness of our sales efforts.

We highly recommend working with Bizz Community, both for the quality of the contacts they provide and for their professionalism and ability to adapt to the needs of companies in the tech industry.
